Abstract 1

Abstract

This reference document provides deployment validation of the Red Hat OpenShift solution, deployed through Installer Provisioned Infrastructure (IPI) in several different data center environments as validated by NetApp. It also details storage integration with NetApp storage systems by making use of the Astra Trident storage orchestrator for the management of persistent storage and NetApp Astra Control Center for management and protection of stateful applications. Lastly, a number of solution validations and real world use cases are explored and documented.
