Using the XCP Data Mover to migrate millions of small files to flexible storage

Previous: [High-performance computing to ONTAP NFS.](#)

This use case is based on the largest NetApp tourism industry customer for on-premises-to-cloud data migration. Because COVID-19 has reduced demand in the travel industry, customers want to save capital expenses on high-end storage in their on-premises environment for the demand pricing application. This customer has a tight SLA to migrate millions of small files to the cloud.

The following figure depicts data migration from on-premises to Azure NetApp Files for small files.

For more information, see the [NetApp XCP Data Mover Solution: On Premises to Cloud](#) blog.

Next: [Using the XCP Data Mover to migrate large files.](#)
